**Sudan's children face growing threat of deadly infectious diseases as vaccination rates halve:**

The country, beset by war, has the world's lowest rates of vaccination, says the World Health Organization, as global immunisation drive also stalls. Children in Sudan, caught up in what aid organisations have called the world's largest humanitarian crisis and threatened by rising levels of violence, are increasingly vulnerable to deadly infectious diseases as vaccinations in the country plummet. In 2022, more than 90% of young children in Sudan received their routine vaccinations. But that figure has nearly halved to 48%, the lowest in the world, according to the World Health Organization. Continue reading... According to World news The Guardian, this development represents a
